CAREER OBJECTIVE

Aspiring Software Engineer With A Strong Foundation In Programming, Problem-Solving And Team-work. Skilled In Building Web Applications And Proficient In JAVA And SQL. Eager To Apply My Technical Skills In A Challenging Role to Deliver Impactful Projects And Contribute To Organizational Success.

EDUCATION

B.Tech, Electronics And Communication Engineering

Sept 2020 - June 2024

Anurag University, Hyderabad, India

GPA: 7.32

Intermediate (M.P.C)

June 2018 - Apr 2020

Sri Vijaya Sai Junior College Bodhan, Nizamabad

GPA: 85.4%

High School (Class X)

June 2017 - Apr 2018

Telangana State Model School, Renjal

GPA: 7.8

PROJECTS

My Clone Websites 1.Spotify 2.Istock 3.Rayromanocontracting 4.Mobirise 5.Olacabs (Sep 2024 – Nov 2024)

Built A Responsive Website Inspired By The Design of Original Websites Using HTML, CSS and JS.

Employee and Admin Management System

Apr 2025

Developed a dynamic web-based "Employee and Admin Management System" using Java Servlets and JDBC, enabling employee self-service and admin control over employee records with real-time data management.

Online Examination System with Real-Time Evaluation

Dec 2025 - Jan 2026

Developed a Project Titled "Online Examination System with Real-Time Evaluation "

- Developed a full-stack web-based Online Examination System that enables secure student registration, section-wise exams, real-time evaluation, automated scoring, and result storage using Spring Boot, React, MySQL, and modern web technologies.
- Later enhanced and migrated the application to a modern architecture using Next.js, Node.js, and Firebase, with deployment on Vercel for improved performance, scalability, and seamless hosting.

HRM Portal (Human Resource Management System)

Jan 2026 - Mar 2026

Developed a centralized web-based HRM Portal to automate and streamline HR operations, reducing manual and Excel-based workflows within the organization.

- Designed and developed multiple HR modules including employee onboarding, attendance tracking, leave management, payroll processing, payslip generation, and role-based access control (RBAC) for different organizational roles.
- Built the application using React.js for frontend, Node.js for backend, Firebase as the database, and deployed on Vercel for scalable and efficient access.

Hyperlocal Quick Commerce Grocery Delivery Platform

2026 - Present

Currently developing a scalable Quick Commerce platform with integrated Admin, User, Delivery Partner, and Marketing modules for streamlined operations and fast product delivery.

- Designed and developed multiple modules including Admin Management, User, Delivery Partner, and Marketing systems to support business operations, order processing, rider authentication, and promotional activities.

- Developing the application using React.js for frontend, Java Microservices for backend architecture, MySQL as the database, and scalable system design practices for high performance and maintainability.

TECHNICAL SKILLS

Programming Languages: Java, C

Web Development: HTML, CSS, JavaScript, React.js

Database Management: MySQL

Backend: JDBC, Servlet, Node.js

Frameworks: Hibernate, Spring, Spring Boot

SOFT SKILLS

Problem Solving: Strong Analytical Skills To Resolve Technical Challenges.

Teamwork: Capable of Collaborating Effectively With Diverse Teams.

Communication: Skilled In Presenting Technical Concepts Clearly.

CERTIFICATIONS

Charani Infotech Pvt. Ltd. Hyderabad : Java Full Stack Trainee

JSpiders : Java Full Stack Developer

AICTE Edu Skills : Network Security Associate Virtual Internship
